

I'm wondering how Federal Recognized Tribes are being factored in as disadvantaged Tribal Communities; which historically the State has played an active role in systemic oppressions and termination policies.

Is there a way to now empower Federal Recognized Tribes through assisting in development of Tribal Energy Programs? We are challenged by the local cost of living issues facing the cape and islands (gentrification), socio-economic challenges, environmental challenges to our lifeways and systemic governmental oppressions. When should we expect support?
